

MOHAMMED SADIK KP

Kerala, India (Open to relocation to UAE) | sadik.build@gmail.com | 090488 34867
linkedin.com/in/sadikkp | github.com/square-story | x.com/sadikbuilds

Professional Summary

- Results-driven **MERN** Stack Developer with intensive training in full-stack development and hands-on experience building scalable web applications. Proficient in **React.js**, **Node.js**, **Express.js**, and **MongoDB** with expertise in implementing complex features including authentication systems, payment integrations, and state management. Demonstrated ability to optimize application performance and implement best practices in code structure. Passionate about creating efficient, user-centric solutions and eager to contribute technical expertise to innovative projects in the UAE technology sector.

Technical Skills

Frontend: **React.js**, **Tailwind CSS**, **Redux Toolkit**, React Query, ShadCN, Framer Motion, React-hook-form, Zod

Backend: **Node.js**, **Express.js**, **JWT** Authentication, REST API, WebHooks, Cloudinary, Inversify, Mongoose, Nodemailer, Redis

Database: **MongoDB**, PostgreSQL

DevOps & Cloud: Git, GitHub, Docker, Vercel, Firebase

Tools & Platforms: Postman, Axios, Stripe/Razorpay

Languages: JavaScript (ES6+), **TypeScript**

Soft Skills: Problem-Solving, Debugging, Code Optimization, Communication, Collaboration, Agile Development

Experience

Full-Stack Development Training, Brototype – Kozhikode, India Jan 2024 – present

- Completed intensive training in **MERN** stack development, focusing on building scalable web applications
- Developed and deployed multiple full-stack projects using **React.js**, **Node.js**, **Express.js**, and **MongoDB**
- Implemented industry best practices including repository pattern, dependency injection, and **MVC** architecture
- Collaborated with peers on code reviews and project implementations, enhancing teamwork and communication skills
- Gained hands-on experience with cloud deployment, API integration, and payment gateway implementation

Projects

Inspecto Feb 2025 – present

A comprehensive web application that connects users with verified vehicle inspectors, streamlining the inspection process.

- Technical Stack: **React.js** (Vite), **Tailwind CSS**, ShadcnUI, **Node.js**, **Express.js**, **TypeScript**, **MongoDB**, **Redux Toolkit**, **JWT** Authentication, Axios, Redis, Stripe
- Implemented a class-based architecture with Repository Pattern in **TypeScript**, improving code maintainability and scalability
- Designed and developed a secure authentication system using **JWT** with access and refresh tokens
- Integrated Stripe payment gateway for seamless transaction processing
- Implemented Redis caching to optimize API response times and improve application performance
- Created a responsive UI using **Tailwind CSS** and ShadcnUI components for consistent user experience across devices
- Applied Dependency Injection principles for better code organization and testability

Zay-Ecommerce Jun 2024 – Jul 2024

A feature-rich e-commerce platform with comprehensive product management, cart operations, order tracking, and payment integrations.

- Technical Stack: HTML5, CSS3, EJS (templating language), Bootstrap, **Node.js**, **Express.js**, **MongoDB**, **JWT** Authentication, AJAX, Razorpay, **MVC** pattern
- Designed and implemented a complete e-commerce solution following **MVC** architecture
- Developed secure user authentication and authorization system using **JWT**
- Integrated Razorpay payment gateway for secure online transactions
- Created responsive product catalog with filtering and search functionality
- Implemented shopping cart with real-time updates using AJAX
- Built comprehensive order management system with tracking capabilities
- Optimized database queries for improved application performance

Open Source Contributions

Inker & TheByteFlow

- Improved API performance by optimizing server-side rendering logic, resulting in 30% faster response times
- Implemented form validation using Zod and React-hook-form, enhancing data integrity and user experience
- Integrated Sonner toast for improved notification system
- Restructured project folders and implemented standardized coding practices, improving maintainability and team collaboration

Education

University of Calicut , B.Com in Computer Application – Calicut, India	Apr 2017 – Mar 2020
Brototype , 12-month intensive training program in Full-Stack Development – Kozhikode, India	Jan 2024 – present
