Skills

Languages — JavaScript (ES6+) | TypeScript

Frontend — React.js | Tailwind CSS | Redux Toolkit | ShadCN | Motion (Framer Motion) | React-hook-form | Zod (TypeScript-first schema)

Backend — Node.js | Express.js | JWT Authentication | REST API | Cloudinary | InversifyJS | Mongoose | Nodemailer | Redis | Socket.IO

Database — PostgreSQL | MongoDB (Mongoose)

Tools & Platforms — Git | GitHub | Postman | Vercel | Docker | Firebase

Soft Skills — Problem-Solving | Debugging | Code Optimization | Communication | Collaboration | Agile Development

Projects

Inspecto
A web application that simplifies vehicle inspections by connecting users with verified inspectors.

- Stack: **React, Tailwind, Shadcn, Node.js, Express, TypeScript, MongoDB, Stripe**
- Reduced DB load by 40% via **Redis** caching; improved response time by 30%.
- Integrated real-time notifications using **Socket.IO** (25% boost in user engagement).
- Using **Docker Compose** and **GitHub Actions** to make deployment easy.
- Applied **Repository Pattern & class-based architecture**, cutting code duplication by 20%.

Zay-Ecommerce
An Textile E-commerce projects include various features such as product management, cart operations, order tracking, payment integrations, and more.

- Stack : **HTML, CSS, EJS, Bootstrap, Node.js, MongoDB, JWT, Razorpay, Excel JS, Express, Multer, Node-cron, Moment, Passport**
- Applied best practices in **code organization, error handling**, and **modular architecture** for maintainability and scalability.
- Utilized **MongoDB aggregation** for generating sales and user statistics, supporting business decision-making.
- Used **Multer** for secure image uploads and **dotenv** for environment variable management.
- Integrated **Razorpay payment gateway** for seamless online transactions and wallet management.
- Designed and managed **RESTful APIs** for product, cart, order, and user operations, ensuring robust **CRUD functionality**

Full-Stack Survey Portal
Developed a full-stack survey application using MongoDB, Express.js, React, and Node.js (MERN).

- Designed and implemented a responsive, user-friendly survey form with **real-time validation** and **anti-spam measures**.
- Applied **TypeScript** across the frontend and backend for type safety and maintainability.
- Utilized **Tailwind CSS** for modern, responsive UI design supporting both light and dark modes.

Open Source Contributions

Inker - Dev Blog Platform
TheByteFlow

- Improved API performance by optimizing server-side rendering logic.
- Implement Form Validation Using Zod and React-hook-form
- implementing a toaster using Sonner toast
- Structured The Folders and Using Standardized Code

Education

Bachelor's Degree - B.Com (Computer Application) <i>University of Calicut</i>	2017 – 2020 Tirur, India
Full-Stack Development Program <i>Brototype</i>	01/2024 – present Kozhikode, India
- Completed 1+ years of intensive full-stack training with MERN stack & agile methodologies. - Built and deployed 3+ full-stack projects, including a production-ready app with real-world use cases and modern UI/UX practices. - Gained deployment experience with Vercel, Railway, and AWS, ensuring end-to-end application delivery. - Solved 270+ coding problems on platforms like LeetCode and HackerRank, strengthening problem-solving and DSA skills.
