

MOHAMMED SADIK KP

Full Stack Developer (MERN)

sadik.build@gmail.com | +91 90488 34867 | Kerala, India | LinkedIn | GitHub | LeetCode | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer (MERN) with over 1 year of hands-on experience building scalable, production-ready web applications. Specialized in TypeScript, clean architecture, and real-time systems. Strong foundation in backend APIs, modern UI/UX with Tailwind, and agile workflows. Proven ability to deliver fast, optimized solutions with a focus on performance and maintainability.

SKILLS

Languages: JavaScript (ES6+) | TypeScript

Frontend: React.js | Tailwind CSS | Redux Toolkit | ShadCN | Motion (Framer Motion) | React-hook-form | Zod (TypeScript-first schema)

Backend: Node.js | Express.js | JWT Authentication | REST API | Cloudinary | InversifyJS | Mongoose | Nodemailer | Redis | Socket.IO

Database: PostgreSQL | MongoDB (Mongoose)

Tools & Platforms: Git | GitHub | Postman | Vercel | Docker | Firebase | Github Actions | AWS (EC2)

Architecture & Principles: Repository Pattern | MVC Architecture | SOLID Principles | OOP Design

PROJECTS

Inspecto 
Vehicle inspection platform

- Reduced DB load by **40%** using Redis; improved API response time by **30%**
- Integrated **real-time notifications** via Socket.IO, boosting engagement by **25%**
- Automated CI/CD with Docker & GitHub Actions, reducing deployment time by **70%**
- Implemented Repository Pattern and modular class-based architecture, cutting code duplication by **20%**

Zay-Ecommerce 
Textile E-commerce platform

- Used **MongoDB aggregation** for live analytics on orders, revenue, and user stats
- Integrated **Razorpay** for 100% secure and seamless online payments & wallets
- Improved admin dashboard usability and reduced product management time by **50%**

Full-Stack Survey Portal 
Type-safe MERN survey system (Light/Dark Mode UI)

- Implemented responsive UI with Tailwind, reducing form drop-off rate by **35%**
- Real-time validation and anti-spam logic improved form submission accuracy by **40%**
- Built with **TypeScript across stack** ensuring 99% type safety

OPEN SOURCE CONTRIBUTIONS

Inker – Dev Blog Platform 
TheByteFlow

- Enhanced **API performance** by optimizing server-side rendering logic.
- Integrated **Zod and React-Hook-Form** for robust form validation.
- Introduced toaster notifications using **Sonner** for better UX feedback.
- Refactored folder structure and adopted standardized coding conventions.

EDUCATION

Full-Stack Development Program <i>Brototype</i> 	01/2024 – present Kozhikode, India
- Completed 1+ years of intensive full-stack training with MERN stack & agile methodologies. - Built and deployed 3+ full-stack projects, including a production-ready app with real-world use cases and modern UI/UX practices. - Gained deployment experience with Vercel, Railway, and AWS, ensuring end-to-end application delivery. - Solved 270+ coding problems on platforms like LeetCode and HackerRank, strengthening problem-solving and DSA skills.	
Bachelor's Degree - B.Com (Computer Application) <i>University of Calicut</i> 	2017 – 2020 Tirur, India
Studied computer science fundamentals including programming, database management, and business computing.
